Abderrahmane Nait Brahim

Computing Student | Systems Engineer

abderrahmane.naitbrahim@gmail.com · +212 67768697 · KL, Malaysia LinkedIn · GitHub

Computing student with hands-on experience in full-stack development, business process analysis, and end-to-end system delivery. Proven ability to work across technical and non-technical stakeholders, produce structured documentation, and break down complex systems into actionable plans. **Available for three-month internship immediately.**

EDUCATION

Bachelor of Science in Computing and Information Technologies *09/2023 – 04/2026, Dubai*
Rochester Institute of Technology in Dubai

WORK EXPERIENCE

Software Development Intern *12/2025 – 03/2026*
Markaba · Remote

- Designed and implemented automated customer communication workflows integrating WhatsApp Business API with Twilio, connecting third-party services into existing platform architecture
- Built and deployed a multi-step WhatsApp UI popup across the company website, improving customer engagement touchpoints
- Conducted end-to-end testing across payment gateway (Moyasar), authentication, and reservation flows
- Improved the car value calculator feature, enhancing accuracy and user experience
- Self-initiated additional improvements beyond assigned tasks, demonstrating proactive ownership of product quality

Business Analyst Intern *07/2023 – 08/2023*
Office National des Chemins de Fer (ONCF) · Morocco

- Mapped the furniture procurement workflow end-to-end at Morocco's national railway operator, identifying key inefficiencies in vendor selection and cost management
- Applied quantitative and qualitative methods to produce a structured report with actionable recommendations

PROJECTS

Helix: Linux Gaming Compatibility Orchestrator *01/2026 – 11/2026*

- Designed and built a distro-agnostic Rust CLI that automates the full configuration and launch pipeline for Windows games on Linux, orchestrating Proton, Wine, DXVK, and system-level tweaks
- Architected a multi-phase engine (detection → planning → confirmation → execution) with a structured decision layer that selects optimal GPU translation, sync mode, and runner per game
- Implemented privilege escalation via polkit (play-helper), multi-layered launch verification against Proton/Wine daemonization, and graceful degradation for non-critical system tweaks
- Verified end-to-end: Modern AAA titles running stably at 60+ fps

Stock Sentiment Screener *01/2025 – 02/2025*

- Developed a Rust-based stock analysis tool using Alpha Vantage, NewsAPI, and FinBERT (LLM) for real-time market data and AI-driven sentiment scoring
- Built MariaDB backend with SQLx, implemented RESTful APIs, and automated data ingestion pipelines combining structured financial data with AI-generated insights

SKILLS

Development: Java 17 · Spring Boot · Rust · Python · Node.js · Vue.js · HTML5 · Tailwind CSS · jQuery
Data & Systems: SQL · MariaDB · MySQL · Database Architecture · REST APIs · API Integration · System Architecture

LANGUAGES

Arabic (Native) · **French** (Fluent) · **English** (Fluent) · **Spanish** (Basic) · **Mandarin** (Basic)
